

**ZEALOUS
EMPOWERING
NURTURER**

Growing with Purpose

Zealous Empowering Nurturer, Incorporated (ZEN) is a nonprofit organization founded by April Booker in 2021 to lessen food insecurities. ZEN developed five programs to actively promote healthy eating in the Charlotte, NC community by providing resources to local schools to start or maintain a garden, by partnering with local long term care facilities to garden with residents and host monthly activities, and by using our Garden for the Community to donate fresh fruits and vegetables to local families and organizations. We are currently in the process of building an outdoor classroom to educate the community on various topics surrounding healthy living.

Today we are asking your organization to support ZEN with a monetary donation. Your contribution will support our programs as well as the expansions at our community garden. You can purchase an ad for your logo to be displayed on our banner and/or website, or you can donate what you are able. Please visit our website (www.bethezen.org) to learn about our programs and what we are doing in the community. Thank you for helping us to *Grow with Purpose*.
